Ladies misses and childrens ready to wear hats. You will be delighted with the prices. W. R. Hutchison. Cane Valley.

It is the general opinion about the square that the garbage cans will have to be removed and stay removed unless they are emptied every two days. The stench arising from them is unhealthy, and we do not believe that the Board of Health will stand for them as now managed. This is a matter that should be looked after at once.

If in need of oils, paints and varnishes, call on, W. R. Hutchison. Cane Valley.

Obituary.

Mrs. Katharine Leach was born near Ozark, June 17, 1887, and departed this life May 4, 1922, making her 34 years, 10 months, and 17 days old.

At the age of 15 she professed her faith in the Savior and united with the Baptist church living a devoted Christian life until her death. When 21 years old she was happily married to Samuel Leach. To this union were born nine children, four of whom survive her.

She also leaves 32 grandchildren, 40 great grandchildren and 2 great, great grandchildren to mourn her loss. Most of her life was spent near Esto. Two years ago she came to the home of her daughter, Mrs. Hiram Conover, near Roy, where she remained until her death.

In this home is a vacant chair and from her accustomed place this noble, good woman is missed, not only by the devoted daughter and kind son-in-law who tenderly cared for her, but by the entire community, as her kind and cheerful disposition won the hearts of all who came in touch with her long, useful life. Until her last illness she was quite active taking a lively interest in all her many friends and was always ready to perform for them any service that would banish a cloud of sorrow.

She was tenderly laid to rest in Blair cemetery, Russell county, her six grandsons, Delworth, Lucian and Cissy Leach, Owen, Omery and Charles Webb being pall bearers. A fitting tribute was paid this long, well spent life by Revs. Edward Aaron and B. F. Phelps.

When the sorrowing ones departed they left a grave covered with beautiful flowers.

Here is a Fish Story.

A gentleman who holds a very responsible position, popular not only with those in his class, but the commonality think a great deal of him—ready to shake his hand upon all occasions, went fishing. He is a member of an honorable profession, and he is also a very extensive farmer. He lives on a large productive farm on Cumberland river, but a short distance from Neely's Ferry. He has a number of helpers on his farm and some of them are very successful fishermen. He can have fish for breakfast, dinner and supper without any effort upon his part, and he how he enjoys them. When he sticks his feet under the table, there being room for nothing else under it, you ought to see him lift a fine Red Horse from the dish to his plate; you should also hear his lips smack. He is a very generous man and he often sends his friends a "mess," and for the fine red-horse we got we are truly thankful. To have such a friend to send in such a rarity is something to appreciate. We hope he will continue to live upon the fat of the land, especially choice fish, for they are said to be the best of brain food. Again, dear friend, we want to thank you, promising to advocate any movement you may start to advance the propagation of appetizing fish. We were about to forget. Our thanks are due for twist of old yellow tobacco.

FACTS WELL WORTH CONSIDERING

There has not been in several years such an opportunity as exists at this time to buy a farm. We are on the verge of the greatest period of extension and development that has ever been experienced in the history of this nation. All present conditions point to the fact that we have passed through the winter of depression into the springtime of prosperity. The farmer is bound to reap more than his share of the good things in store, as the products of the farm are everywhere advancing in price. The Tobacco Growers Association has passed the experimental stage and is a success beyond the fondest dreams of its friends. Never again will the tobacco grower be at the mercy of the buyer, for this wonderful cooperative association absolutely assures him an equitable price and fair grading on his entire crop.

Another phase of Kentucky's agricultural development is the recent organization of the Kentucky Live Stock Growers Association. This means that within a few years Kentucky would be the leading live stock State of the Union. What does this all mean? Simply this—that land which is the basis of all wealth must also advance. If you ever expect to buy a farm, now is your time; your opportunity.
